

Diagnosing the health of your data security and privacy status to help you to better understand your risks, vulnerabilities and opportunities.

March 2021 - v1.0

Give your business a **data\* security and privacy health check**.

Our **diagnostic health checks help our clients to understand the current status of their data security and privacy controls**.

Whatever stage you are at in managing your data, cyber and information security we can help you by identifying quick wins in addition to longer term opportunities to improve your data controls.

Everything we review and recommendations we make will assist you to avoid data security and privacy incidents and breaches in your organisation, maintaining the reputation and viability of your business.

Diagnosing the following areas will almost certainly yield areas we can help you to improve:

- Information Security Policies
- Data Security Governance
- Human Resource Security
- Asset Management
- Access Control
- Cryptography and Encryption
- Physical and Environmental Security
- Operational Security
- Communications Security
- Systems and Software Security
- Third Party Service Provider Security
- Data Security Incident Management
- Business Continuity Management
- Compliance

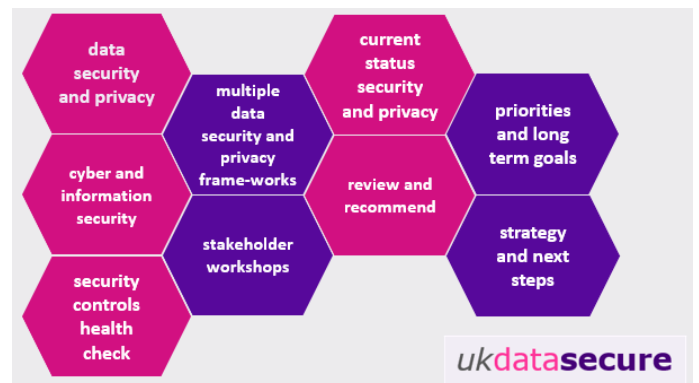

Whatever stage you are at in managing your data, cyber and information security **we can help you by identifying quick wins** in addition to **longer term opportunities to improve your data security controls**.

We can work with many data security and privacy frameworks to assess your current status, some of

which you may already be familiar with, including:

- PCI DSS
- ISO27001
- GDPR (UK Data Protection Act 2018)
- Cyber Essentials and Essentials Plus
- IASME Governance
- SOC2
- NIST

Once we have established the framework(s) you wish us to use to diagnose your business against, we will run appropriate workshops with your key business stakeholders; outcomes will include documented prioritised recommendations for improvement.

I look forward to talking through the details of our Diagnostic services with you as soon as we can, including:

- Land and Expand Workshops
- Vulnerability Testing

I look forward to working with all of our clients to improve your data risk management and information security governance and compliance programs.

Stuart Golding - Founder and CEO

\*for 'data' also read and include 'information' and 'cyber' security
