

Working collaboratively with you to deliver bespoke engagements to remediate and mitigate risks and vulnerabilities.

March 2021 - v1.0

Bespoke engagements to address specific data and cyber security and privacy challenges.

Our consulting engagements generally consist of collaborative projects in which our subject matter experts support clients in addressing significant data and cyber security initiatives.

Typically such engagements include full life-cycle management and governance of clients' data and cyber security strategy and programs, achieving compliance with frameworks including:

- PCI DSS
- ISO27001
- GDPR (UK Data Protection Act 2018)
- Cyber Essentials and Plus
- IASME Governance
- SOC2
- NIST

We can help you by delivering an audit and gap analysis against any one of the frameworks above, deliver a detailed comprehensive diagnostic report with recommendations, and then assist you with delivering our recommendations, in order that you can achieve validated compliance and certification.

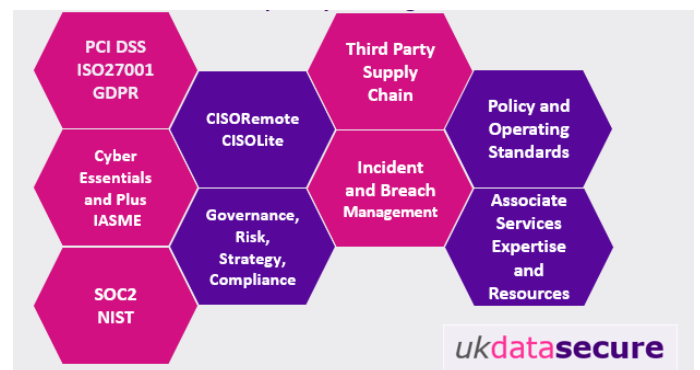

Your Journey - We can help you regardless of where you may be on your organisation's journey, whether you are at the beginning of your data and cyber security program or you may have just been through a significant business or regulatory change, or you need a small task force to get a compliance programme over the line, or you may just need another opinion from another information security and privacy professional.

Agility - As a small consultancy, we can be agile and tailor our consultancy to be bespoke and unique for your organisation, and relevant to your data security and privacy maturity.

Maturity and Culture - Success for us is working within

your culture, assisting your organisation to achieve a level of maturity in the way you govern and manage your business-critical data and information security assets, so that over time we can reduce our involvement and our cost to you.

Plain Language - We avoid jargon where-ever possible and deliver everything in plain language; we keep our advice and guidance simple, effective and measurable and focus on getting the basics right first.

I look forward to talking through the details of our Consultancy services with you as soon as we can, including the following areas of expertise:

- CISO Remote and CISO Lite
- Governance, Risk, Strategy and Compliance Simplified
- Third Party Supply Chain Management
- Incident and Breach Management
- Policy and Operating Standards
- Associate Services
- Data Security and Privacy Expert Resources

I look forward to working with all of our clients to improve your data risk management and information security governance and compliance programs.

Stuart Golding - Founder and CEO
